NEW! Top Secret Hand-To-Hand Fighting System Finally Released To Limited Number Of Civilians!

"You'll Be Amazed At How Fast You Can Learn It!" Now you can easily "take down" trained boxers, Karate black belt masters & street thugs twice your size...even if you've never been in a real fight before in your life! Wouldn't you like to have the confidence in knowing without question that you can "neutralize" the threat of physical assault by criminal scum as easily as you would squash a fly? You've never heard about Paul Vunak, but the SEALS, FBI, CIA & a dozen police SWAT teams have. The U.S. Navy SEALS brought him in to teach his unique system after an exhaustive worldwide search for the best hand-to-hand combat system in existence. The SEALS aren't interested in learning complicated martial arts like Karate or Tae Kwon Do. All that fancy kicking & hacking may look scary, but it doesn't work on the battlefield...or in the street. Paul followed only one rule when choosing the moves he would use in his simplified hand-to-hand system: **It had to work 100% of the time in street fights...where there are no rules.** As a result, there are only 8 moves total. All of them are unbelievably effective, & all can be learned & mastered in only a matter of hours. You don't have to be quick, or coordinated, or even in decent physical shape. You don't need to train constantly to become a master. Women, grandmothers, even children have learned it. A thousand guys smaller & weaker than you have learned it, too. Almost overnight. You'll feel confident using Paul's system even after a single lesson. This video is all you'll need & should be the most intense & enlightening hour you'll spend in front of a T.V.! Everything is broken down into its most easily-learned form. **In fact, you'll have enough powerful know-how after just one viewing to increase your natural fighting ability by 200%...instantly!** Paul even took the time to show you real-life examples in order to remove any doubt you may have as to how to use your new skill in the real world. Isn't it time for you to decide that you're not going to "run scared?" Isn't it time to really know how to protect yourself so you can walk the streets with confidence? But, hurry. We have been told that the military may not want this information available to the public for very much longer! 60 min. VHS.

NEW! Secrets That Can Defeat Even The Toughest Streetfighters!

Mastering the advanced hand-to-hand combat techniques in Street Safe II can make you virtually undefeatable in face-to-face combat. Just knowing these secrets will put you in an entirely new category of fighter, no matter what your previous experience is. In Street Safe I, Paul Vunak, the man who teaches the Navy SEALS how to fight, showed you 8 unbelievable moves to defeat street thugs. These moves will work 90-95% of the time. **But unless you understand the secrets of defeating the sudden, extreme violence (read gangs & weapons) of the most vicious criminals, you're not totally prepared.** Not one street fighter in a thousand even has a clue these secrets exist. "Insiders" know that Paul Vunak is responsible for picking up the mastery of "perfect fighting skills" where the legendary Bruce Lee left off. **Knowing these skills is the difference between walking in cold fear & having the absolute confidence you can quickly "injure to degree."** This means you choose how bad off your attacker will be when the fight is over (usually within a few seconds). In these two videos, Paul goes beyond what he has taught soldiers, cops & government agents...revealing fighting secrets that, until now, you could have gotten only by paying thousands of dollars for personal instruction. **Your special video set includes:** a single move that cannot be defended against & will end 90% of potential fights; how to use your knowledge of what really happens in a fight to "cheat" in ways your opponent can never guess; the one basic secret of winning street fights that almost no street fighter knows; who the "vicious top 10%" of street fighters are & how to cancel their most-developed skills; how to defeat your opponent with a few economical moves without getting touched yourself; specific "map" of the best neural response targets to hit; how to use basic "submission holds" to keep him down & under control; how to use ground fighting techniques in case you are surprised or in a very tight area that causes you both to fall; every street weapon that is available in a fight, & the only correct way to use them to end the brawl immediately; the astonishing secret called "Defanging The Snake" that gives you a 1000-to-1 advantage against an armed assailant; the only true way to counter & win a knife attack; why there can never be a "perfect weapon" in a street fight, because no matter what you're faced with, you can quickly take away the advantage of an armed attacker. **"Classic" martial arts just don't cut it—-you already know that. What Paul shares with you isn't "art"—-it's just fighting secrets at a level you won't believe until you see it for yourself. 83 min. 2 VHS video set.**
